## FRANKE PRODUCT CATALOGUE-APRIL- 2022

## FRANME

is Swiss

It's easy to be ordinary; to have an ordinary home, filled with things you neither love nor hate. But you should never settle for ordinary and that's why we want to make everything we make wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way; from the first glimpse of carefully considered design, to manufacturing standards that ensures you can feel the quality and craftsmanship of every
 piece.

This catalogue captures the spirit of wonderful in order to captivate and inspire you. A comprehensive range of sinks, taps and accessories can help turn an everyday kitchen extraordinary and turn a daily chore into a guilty pleasure.

Let everyone else be ordinary. Let's make it wonderful.

## Franke Headquarters in Aarburg, Switzerland

Since 1911, Franke has been known for its dedication to research, development, manufacture and service. Today, it is one of the world's leading suppliers of kitchen sinks, taps, cooking hobs and extractor hoods.

GLOBAL FOOTPRINT

The Artemis Group includes the Franke Group, the Artemis Real Estate Group (real estate portfolio in Switzerland and abroad), a majority holding in the Feintool Group (world market leader in fineblanking technology) and the Artemis Asset Management Group (various strategic shareholdings in international companies listed on the Swiss stock market and in private companies). Franke is a world leading provider of products and solutions for residential kitchens and bathrooms, professional food service, coffee preparation and semi-/public washrooms. The Artemis Group has about 9,200 employee in 72 countries, 5 continents. In 2020, the group generated consolidated Net sales 2.42 billion CHF.

## ADVANTAGE FRANKE - High Grade Materials

## TECTONITE®

Made in The Netherlands.
TECTONITE® is the latest innovation by Franke - made of TECTONITE®, which is a hi-tech, light but strong synthetic material that gives you amazing advantages:

- It is extreme temperature resistant (230-300 degrees)
- It is scratch resistant and has a super smooth and easy to clean texture
- It is resistant to chemicals used in $t$ he kitchen (vinegar, tomato sauce, etc.)
- It has a UV resistant coating (its colour will not change)
- It is a $100 \%$ recyclable material
- It is available in three high tech colours: carbon black, artic white and coffee
- It has a five year warranty

## TECTONITE® Technology

## Beautiful and Strong

A great looking and smooth surface, the TECTONITE® material prevents scuffing or scratching. It is also easy to clean and doesn't lose colour.

## 3rd Generation Coating

A new coating called PiMC (Power in Mold Coating) gives a protective layer providing strength to the material and protecting its colour.

## Exclusive Texture

It is finished with an exclusive texture that coats the sink and repels water and dirt to keep the surface looking as good as new.

## AUSTENITIC STAINLESS STEELS (SS 304 - AUSTENITIC GRADE)

All Franke Stainless steel sinks are manufactured using only SS 304 Austenitic grade. Austenitic stainless steel are chromium \& nickel containing stainless steel with very low carbon content. Austenitic 304 stainless steels formed through the generous use of austenitizing elements such as nickel, manganese and nitrogen. Chromium content is range of $18 \%$ and nickel content in range of $8 \%$. They are non-magnetic but can become slightly magnetic when cold worked. Cold working also enhances their strength. Austenitic stainless steel have mechanical properties over a wide range of temperatures. In addition, these steel are easy to clean, which enhances their use in applications in hygienic and sterile environments.

AISI

SS304
18/10: 18\% Chromium and 10\% Nickel

## AISI $18 / 8$ <br> $18 / 8$ SS304

SS304
This material is used in Neptune

18/8: 18\% Chromium and 8\% Nickel
This material is used in 610/611, 620, 621, 651 and Adrian Series

## SUPERIOR FINISHES \& PERFORMANCES

## Microdecor Finish

The distinctive pattern of Microdecor steel is so light as to be almost invisible, recalling the effect of aluminum and giving the steel a unique, inimitable appearance. Any scratches only damage the tiny convex areas of the surface, while the imperceptible concave zones prevent the formation of visible marks.

## European Satin Finish

Franke uses a unique process of brush polishing on CNC controlled latest technology machine along with special "Franke" ATL-F22 paste that gives product surface a smooth European Satin finish with good aesthetic look. This makes it best suitable for all kitchen applications since it is prone to scratching during daily usages.

## 25 Year Warranty

All Franke Stainless Steel Sinks are guaranteed for 25 Year against faulty workmanship and material.

5 Year Warranty
All Franke Color Sinks are guaranteed for 5 Year against faulty workmanship and material.

## 1 Year Warranty

All Franke Taps, Bio Waste Disposer, Plumbing Kit , Roller Mat and Accessories are guaranteed for 1 Year against faulty workmanship and material.

## DISCLAIMER

[^0]TECHNOLOGY IN STAINLESS STEEL SINKS

A world leader in the production of sinks, Franke offers a unique range of products comprising models at the very pinnacle of functionality and design, complete with various accessories that epitomize practicality and efficiency.

Exclusive treatments: To further improve the quality of the steel, enhance the sheen and increase its resistance to wear, Franke carries out exclusive brushing and polishing treatments. The treatment, applied to hobs and sinks alike, also enhances the visual aspect of each solution.

Years of research and experimentation have allowed Franke to guarantee the use of premium quality raw materials and the creation of excellent finished products in terms of: form and function; ease of use and total safety; water and energy savings with environmental protection in mind.

Only The Best Steel:
Franke luxury collection offers AISI $30418 / 10$ steel for the manufacture of its sinks. This stainless steel is highly resistant to rust and to the aggressive action of acids and chemical products.

## Differentiated Solutions:

Franke offers built-in, under-top and top-flush solutions to satisfy all sink integration requirements while enhancing visual appeal and practicality.

TECHNOLOGY IN STAINLESS STEEL SINKS

Innovative Steel: Franke has always been committed to researching innovative material combining beauty, quality and performance.
Satin Finish Steel: Franke enhances its durable and flexible steel with an exclusive non-scratch satin finish for lasting elegance and practicality.
Decor And Microdecor Steel: Designed to protect from scratches, abrasion and corrosive agents, Franke patented Decor and Microdecor finishes create a stunning aluminum effect, enhancing shapes and emphasizing the elegance of each design.

Rules for keeping steel in perfect condition:
Stainless steel is easy to clean and extremely hygienic. In fact, its smooth, nonporous surface makes it difficult for bacteria and micro-organisms to survive. The best way of caring for steel, to keep it bright and shiny and prevent scratches or unsightly marks, is to follow these few simple rules:

- The first time you use it, take extra care when treating and rinsing the surface, to avoid contact with aggressive detergents and prevent ferrous substances in the pipes from being deposited
- Always use cleaning products specifically formulated for stainless steel and do not use detergents containing chlorine, bleach, hydrochloric acid or limescale removal agents
- When cleaning, use soft cloths and not abrasive sponges or metal scourers
- Always rinse thoroughly
- Never leave wet sponges or utensils containing iron on the surface for long periods of time
- Only store containers of detergent or acidic chemical products under the sink once they have been closed

BOX - European Satin Finish

## BOX - European Satin Finish

## INSTALL PERFECTION IN A MOMENT

A Red Dot award-winner for best-in-class design, the Box range of sinks helps you get the job done simply and with style.

- Easy to install as a built-in sink, slimtop or undermount
- Premium quality stainless steel. High stain and corrosion resistance

Features:

R12 mm Radius, Free from sludge deposition.

Seamless Rim with Elegant match to counter top.

Suited for Under Mount also

All Franke stainless steel BOX or Square are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacturing. The grey dynaphon spray also insulates, minimizing heat escaping from the bowl, keeping water warmer for longer.

## FRAGRANITE

Following extensive testing and development, new Fragranite tackles the humble cleaning problem associated with composite sinks. The revolutionary new Fragranite+ technology is now available on all Franke Fragranite and Silk Sheen Fragranite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to keep clean.

Kitchens can be a fertile breeding ground for bacteria, mold and mildew, which can lead to material damage and cause unpleasant odors and stains. On unprotected material, bacteria levels can increase every 20 minutes. The integrated Sanitized® protective function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning practices, but helps to keep surfaces clean. Fragranite treated with Sanitized $\circledR^{\circledR}$ reduces bacterial odors by $99 \%$. Sanitized $®$ protective function helps to keep sink surfaces clean by reducing the growth of bacterial odors, mold and mildew even between cleaning.

The granite particles bonded together during manufacture are now smaller, creating a smoother, flatter surface, reducing the chances for lime scale to build up. It is also far more difficult for residue, food particles and bacteria to accumulate in between the granules, which greatly improves hygiene.

Tested against leading competitors, DuraKleen ${ }^{\circledR}$ Plus comes up trumps on stain resistance. Even after being left to sit on the sink for 18 hours, the toughest stains like beetroot, permanent marker, red wine and iodine can simply be wiped clean away.

## SANITIZED ${ }^{\circledR}$

With all the foodstuff around in both raw and cooked states and at various stages of the process of cooking, kitchens are an obvious breeding ground for bacteria. Therefore, as an area that's critical to keep clean and bacteria-free, they need special attention to be paid to them.

On unprotected material, bacteria can multiply every 20 minutes and have a seriously adverse effect on hygiene. The possibility of transferring bacteria is also higher on untreated material. Which is why we have designed our Fragranite sinks with an integrated Sanitized $\circledR^{R}$ hygiene function. This helps to keep the area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized ${ }^{\circledR}$ reduces bacteria and microbe growth by as much as $99 \%$.

The silver ion locates the bacteria via the moisture and deactivates it.

Substrate with silver ions

Sanitized $®$ also helps to keep the sink surface hygienic and protected from bacteria and microbe growth after and in between normal cleaning cycles. So, all in all, you have an almost-bacteria-free washing-up area.

FRAGRANITE

| Staining agent | Ease of cleaning |
| :--- | :--- |
| Coffee | Cold water |
| Red wine | Cold water |
| Olive oil | Cold water |

MATERIAL CHART
Fragranite / SilkSheen

This chart has been developed by Franke to assist in grading the various materials in terms of their performance characteristics for each category.

It is intended to act as a guide for different requirements: 10 points - the best material tested in this performance category. For example, in our tests Fragranite/SilkSheen scores highly in scratch resistance and hygiene.

## KITCHEN FAUCETS

## Body Material

Bronze (59-\% - 63\%), low lead content ( $0.8 \%-1.6 \%$ ) low residue (<1.5\%) - gravity casting or low pressure casting. Most products in the market are sand cased with lots of pinholes and uneven body thickness.
Electroplating
The thickness of the nickel plating is more than international and European standards and more corrosion resistant than others.

## Surface chrome plating thickness for Nickel and Chrome

## Franke

International Standard
EN 817 / EN 200

Nickel > 7.5u

Nickel > 5 u
Chrome $>0.1$ u

Cartridge: German Ceramic Cartridge and Longer Life.
Flexible hose: Spanish S/S 304 exible hose, pressure resistant and corrosion resistant.

Aerator: Using top grade Aerator, integrating water saving and water flow. Fasteners: All using Stainless Steel

Disclaimer : Inlet pipes supplied with the product are of standard size, may vary from product to product. Check before purchase if any.

## INTRODUCTION

Franke "Turbo Elite" Waste Disposal Unit is designed to free the kitchen of unsightly and unhygienic household waste and is the essential add-on for ensuring that your kitchen remains looking immaculate.

Thanks to a permanent magnet motor, Franke WDUs reach high speed in a split second, producing more torque per kilo than any other of its type Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

Includes integrated Air Switch. Includes antibacterial protection for odour control.
This is a slim line model ideal for fitting into 1.5 bowl sinks where space may be limited.

## ADVANTAGES

## 1. MOTOR

Due to the high speed and torque (twisting power) of the permanent magnet motor, most potential jams are eliminated.

A common problem with induction motors is that they have

a starting winding and running winding. When the disposer is used improperly, i.e. food waste being deposited before starting the disposer, it is up to the starting winding to overcome the load on the turntable.

This often results in jamming since the starting winding does not have the torque necessary to overcome many jamming situations.
The Permanent Magnet Motor used in the Bio Shield Series disposer reaches full torque on the initial revolution, therefore avoiding the jamming situations as mentioned above.

TORQUE MASTER

Features Balanced turntables and balances armatures as the heart of the system. This along with corrosion proof components provide for less vibration.

## 2. BIO SHIELD

A Unique Antimicrobial agent is permanently molded into the "Wet" components that helps prevent bacteria-caused odors.

It also inhibits the growth of a wide range of microorganisms.

## 4. Corrosion Proof

The Number One cause of failure for our competitors' disposers is corrosion. Corrosion can cause leaks, jams, and allows bigger food particles through holes enlarged by rusting, which can cause clogging of the drain pipes.

Our all "Turbo Elite Series" models have stainless steel metal grinding chamber parts (turntable, swivel impellers, and the grind ring). This makes the Turbo Elite Series disposer corrosion proof.
